Instant Analytics + Cloud Quality = True Data Value

Sample Dashboard

Data value comes from a strategic mix of speed and quality. The analytics tools and cloud technologies that find more value in your data have arrived. Together, built for both speed and quality.

Is critical data missing when it counts? Is your data too old to capitalize on next quarter? Next year? It's time to jump-start your information. It's time for superior quality.
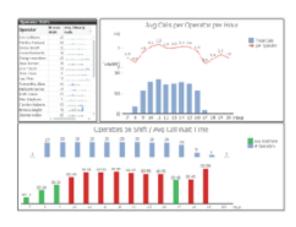

Where BI@S finds value:

- Mobile devices move faster than laptops

- In-memory computing returns in minutes, not days

- New sources of data deliver a complete business view
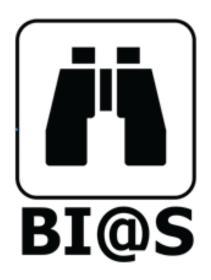

- The cloud specializes in on-demand delivery

BI@S, Business Intelligence as Service, makes your business faster, while ensuring best-in-class quality using the latest tools and technologies from SAP and AWS.

BI@S analytics are value:
- Cloud

- Compliant

- Outsourced

- Integrated

- Mobile
